

# JUMPSTART YOUR PLATFORM ENGINEERING WITH KAOPS

NETHOPPER OFFERS A CLOUD-NATIVE, GITOPS-CENTRIC FRAMEWORK TO HELP YOU BUILD YOUR IDP.

Powered by Nethopper

# KAOPS platform

## ABOUT NETHOPPER

Nethopper is pioneering KAOPS, a Kubernetes application operations platform-engineering framework SaaS. KAOPS makes your journey to cloud native technologies secure, simple and easy.

With KAOPS, you can:

- ✓ Jumpstart platform engineering today
- ✓ Save cost and boost operational efficiency
- ✓ Automate the Ops in DevOps across clouds and clusters

## WHY CHOOSE US

We hide the complexity of Kubernetes application operations for your platform & DevOps teams to do more with security, speed & governance.

### Simple to Use Friendly-UI

Enhances developer experience with centralized, DevOps friendly-UI and AIOps.

### Faster Time-to-Market

Reduced time-to-market by over 2 years with support for edge/hybrid/multi-cloud.

### Any Kubernetes on Any Cloud

KAOPS works with all clouds and Kubernetes distributions to help platform & DevOps teams to organize and automate processes, tools, and clouds.
